Web Application Development

Arden University

Web Application Development Workshop 2

Agenda

- Resit reminder and week 1 review
- Starter activity
- Activities 1 - 4
- Consolidation activity: Choose Your Own Adventure (CYOA)

Reminder: Resit Submissions

If you need to resit this semester please remember:

- Resit submission deadline is Week 6, Wednesday 2:00pm
- Ensure you read any previous feedback to identify the areas that need to be changed
- Check your work against the marking rubric to ensure you have covered all minimum requirements within the Pass grade boundary as
- Resit support options can be accessed from the Resit tab in the relevant ilearn module

Module Overview

Week		Workshop	Office Hours
1	Web application architectures and technologies	Y	
2	Hosting an application, PHP and JS first steps	Y	Y
3	Connecting to a database	Y	Y
4	Learning JavaScript	Y	Y
5	JavaScript objects	Y	Y
6	Consolidation week 1 (multipage app)	Y	Y
7	Consolidation week 2 (single page app)	Y	Y
8	Sessions, cookies and password hashing	Y	Y
9	SQL injection attacks	Y	Y
10	Assignment submission – Weds. before 14:00	Y	Y

Workshop 2 Learning Objectives

Workshop Learning Objectives

By the end of today's lesson you should:

- Understand your own depth of knowledge of HTML
- Be able to access your web development platform and use the uploading tools
- Have demonstrated your ability to create documents using HTML, PHP and JS
- Learnt about a newer development in HTML
- Be able to use a tool to check cross browser compatibility

Week 1 review

What is meant by the terms MPA and SPA?

Can you give an example of each?

What are the three “tiers” of a 3-tier architecture?

What do the individual letters of LAMP stand for?

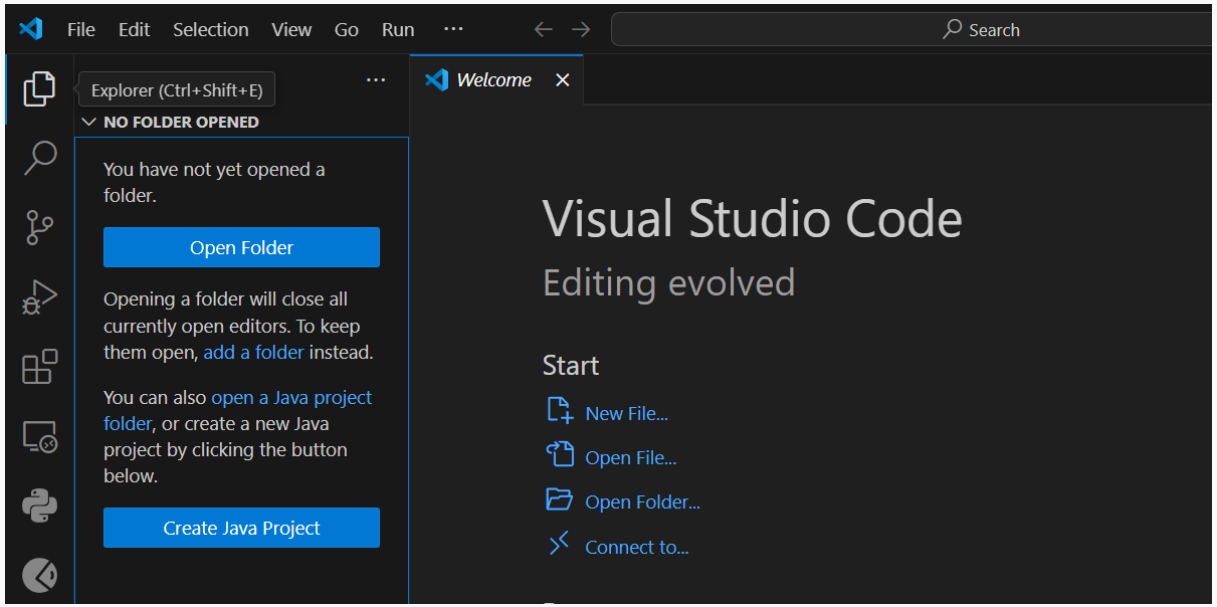

And MERN?

HTML Starter Activity
VS Code

Topic: HTML starter activity

Can you open a copy of VS Code and build a basic HTML structure simply using the ! shortcut?

For a shortcut reference, head to: https://docs.emmet.io/cheat-sheet/

Activity 1
Web-hosting platform

ARDEN UNIVERSITY

About the file manager and database limits

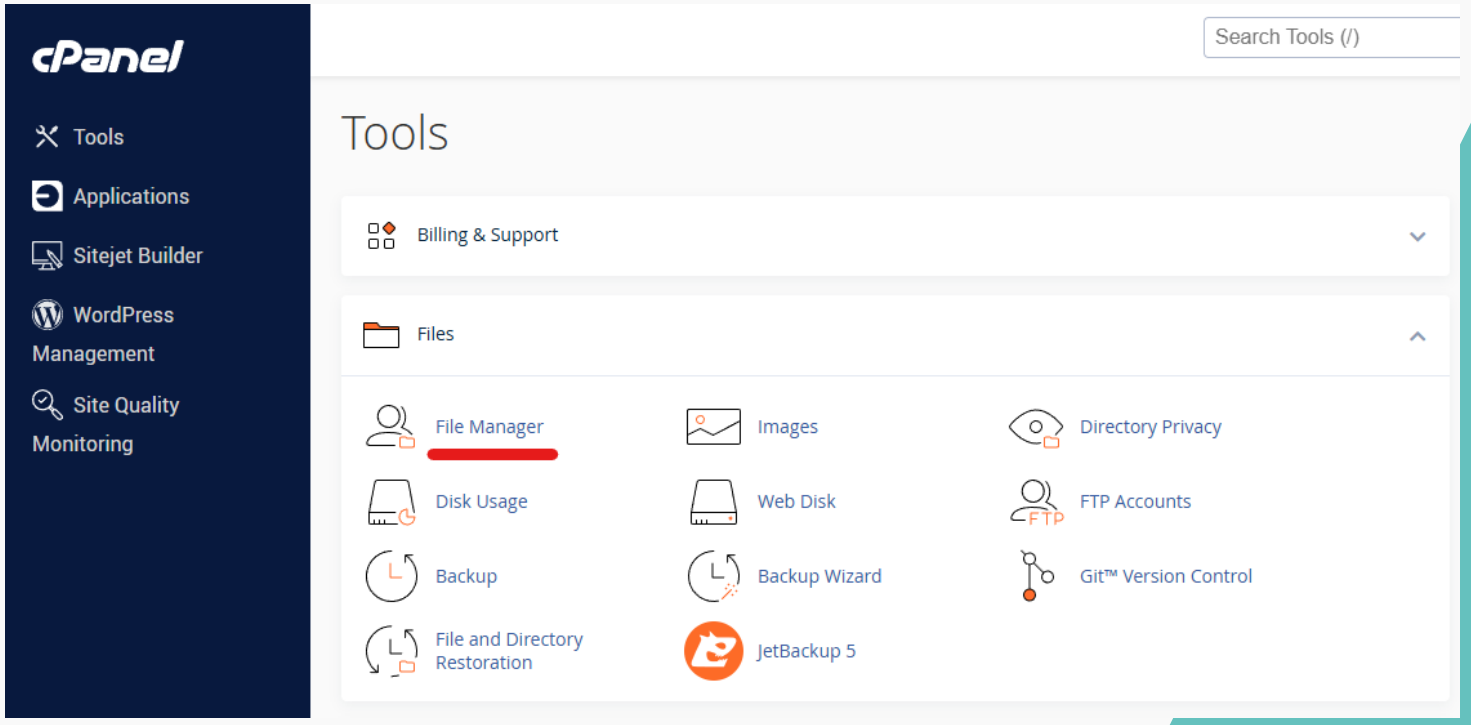

https://webhosting.arden.ac.uk/

- File manager
    - Files and folders
    - Editing in place
    - Uploading
    - public_html
- Databases
    - Limit of 6
    - Manage both databases and application user accounts

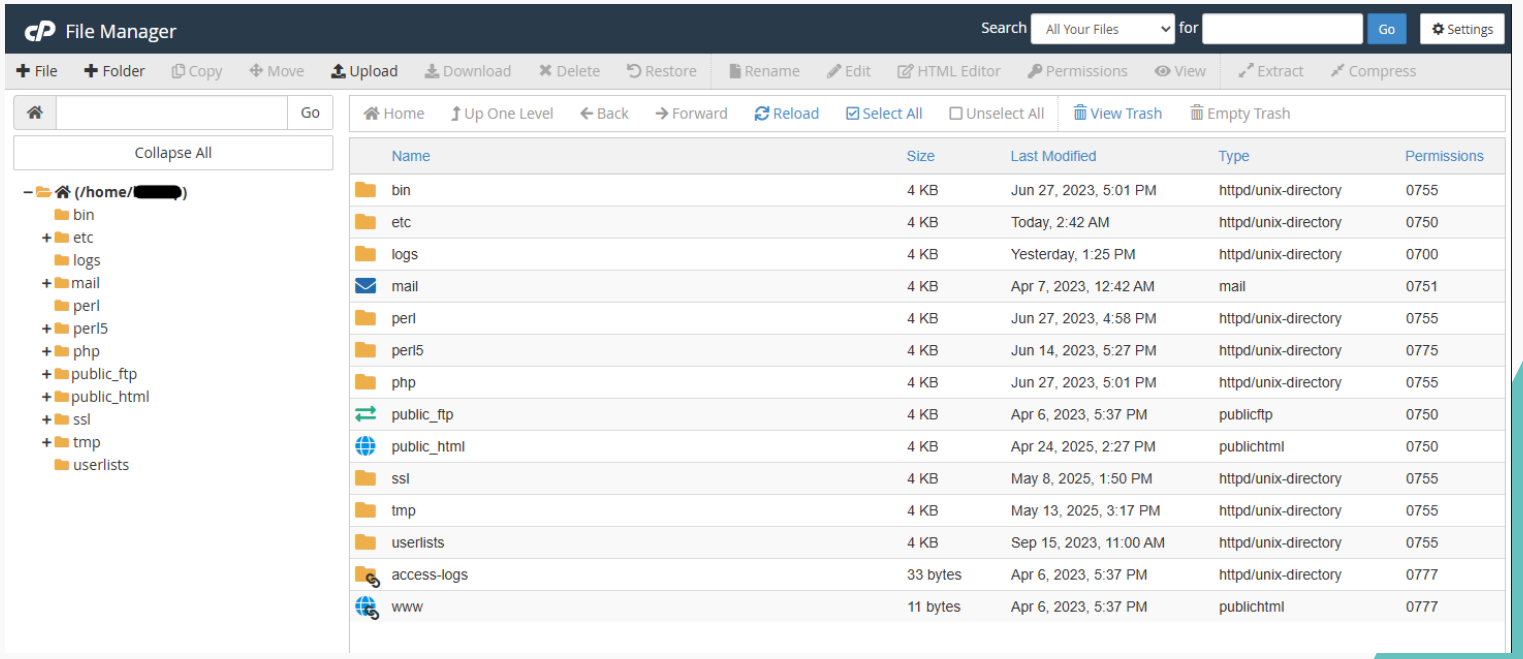

Find the File Manager

- Log in to the platform
- Find file manager under Tools on cPanel
- Click on the link

What is “File Manager”?

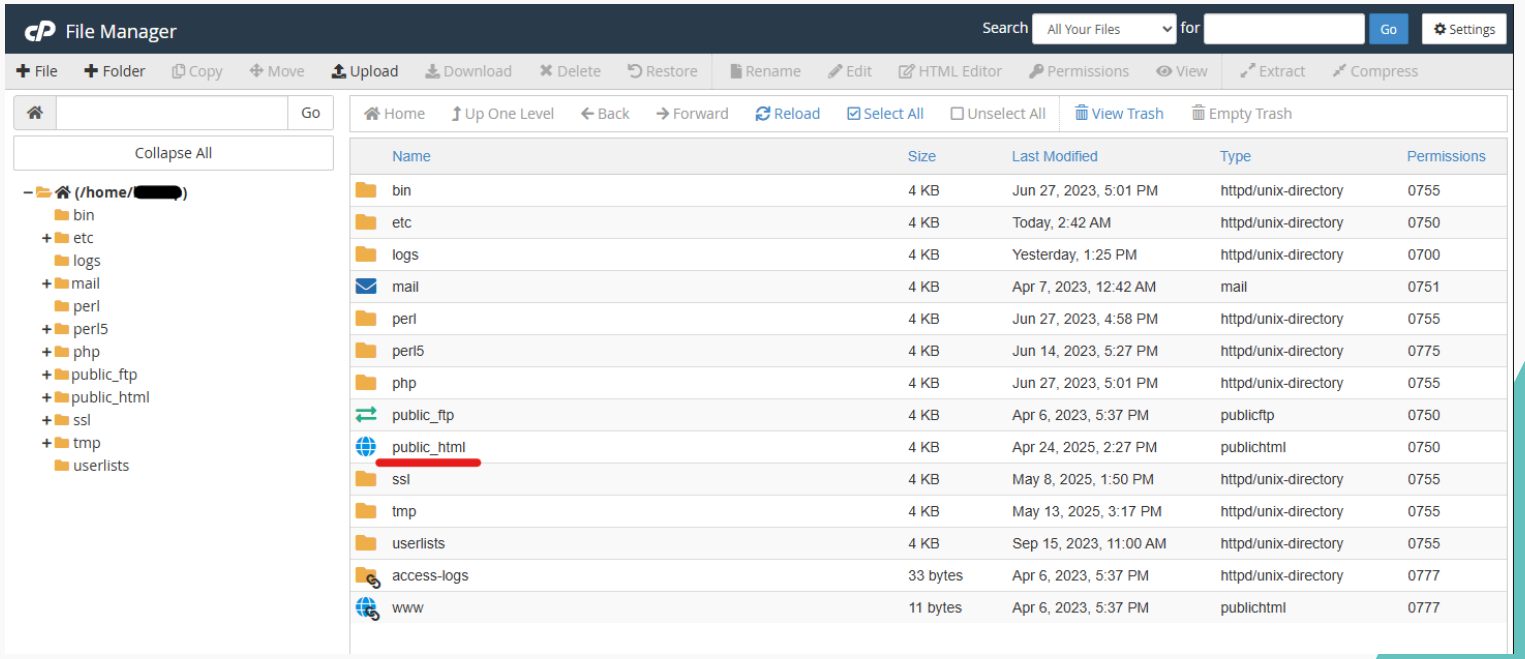

- What is "File Manager"?
- Windows Explorer like interface
- GUI access to the Linux filesystem on the server
- You start logged in to your ’/home/’ directory

What is the “web root”?

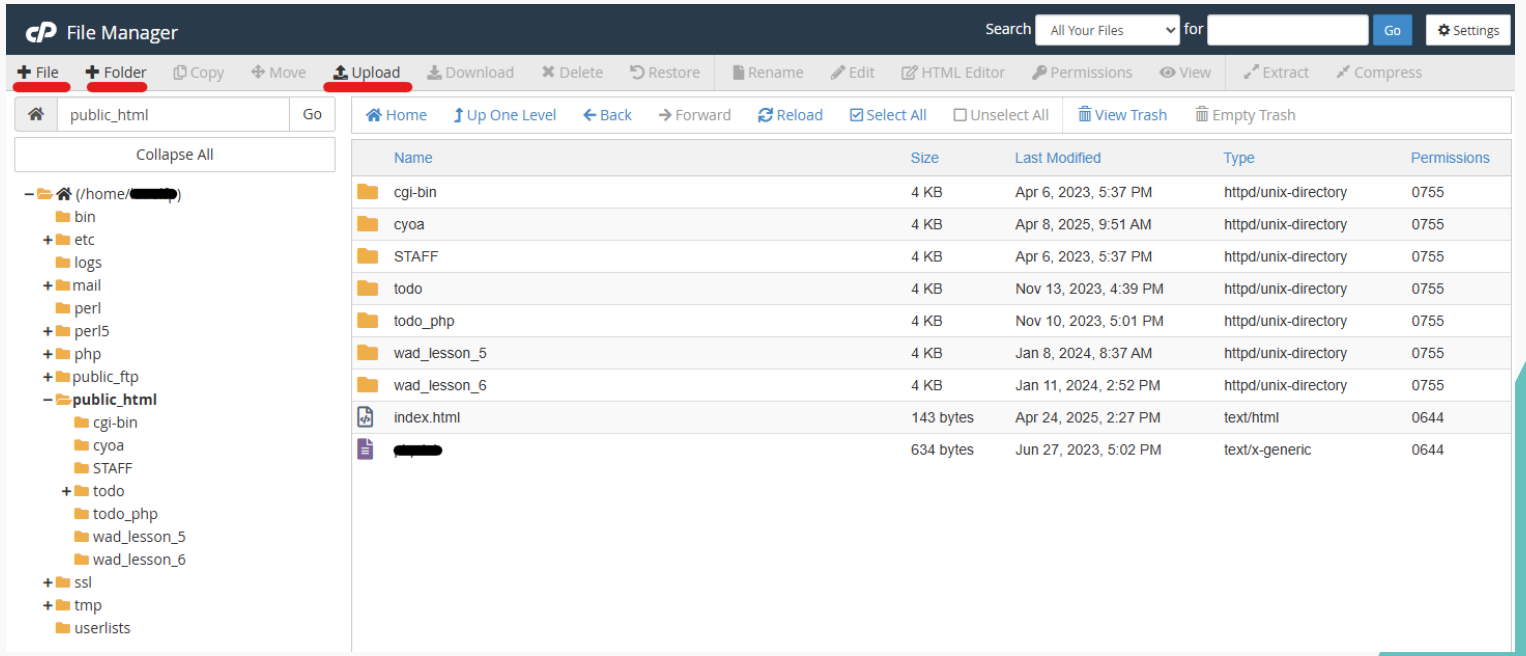

- public_html folder is your ’web root’
- Files in this folder are available on your public website
- The ’www’ folder at the bottom is a ’symlink’ to public_html

(Like a Windows shortcut)

Creating files and folders

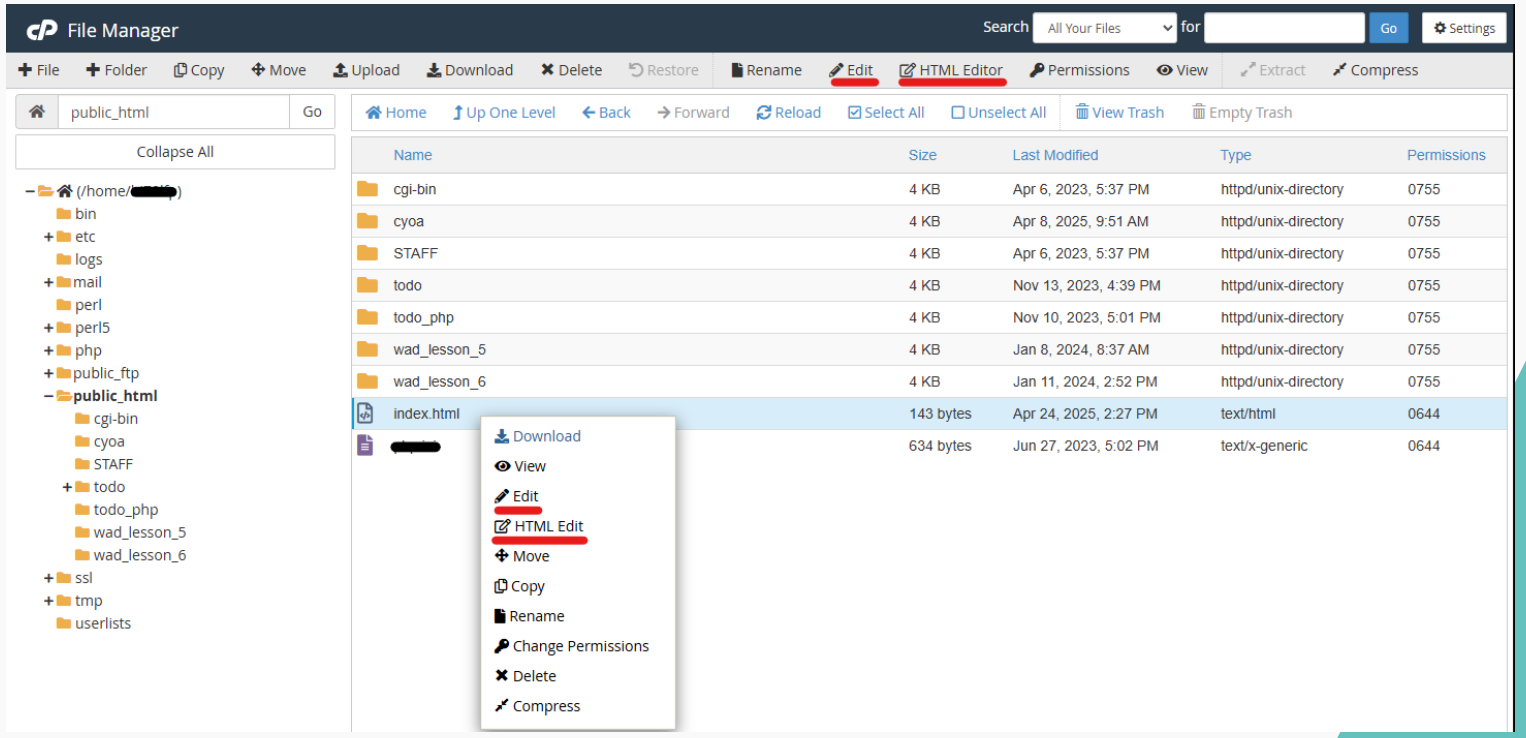

- You can create new files and folders using the top menu
- This also gives you the option to upload files from your PC to the server
- Create an empty 'index.html' file in your web root folder

(or create one on your PC and upload it using the File Manager interface)

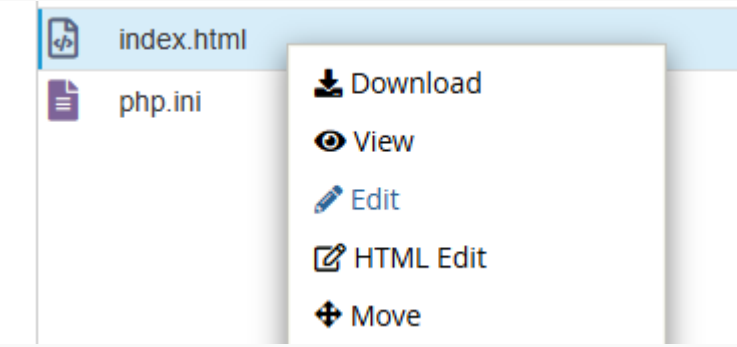

File Manager menu functions

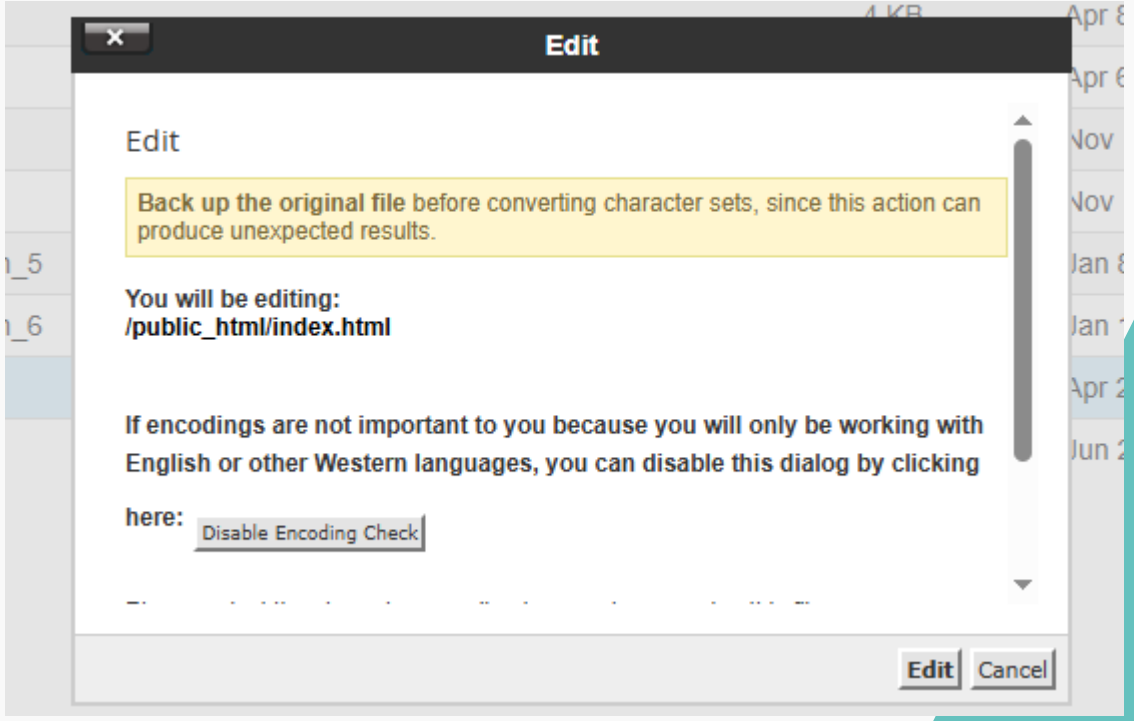

- You can perform lots of of operations on files using the top menu
- Right clicking brings up a context menu with the same options
- Using these tools you can edit files in place (directly on the server)
- There is also a WYSIWYG HTML editor available

Editing a file

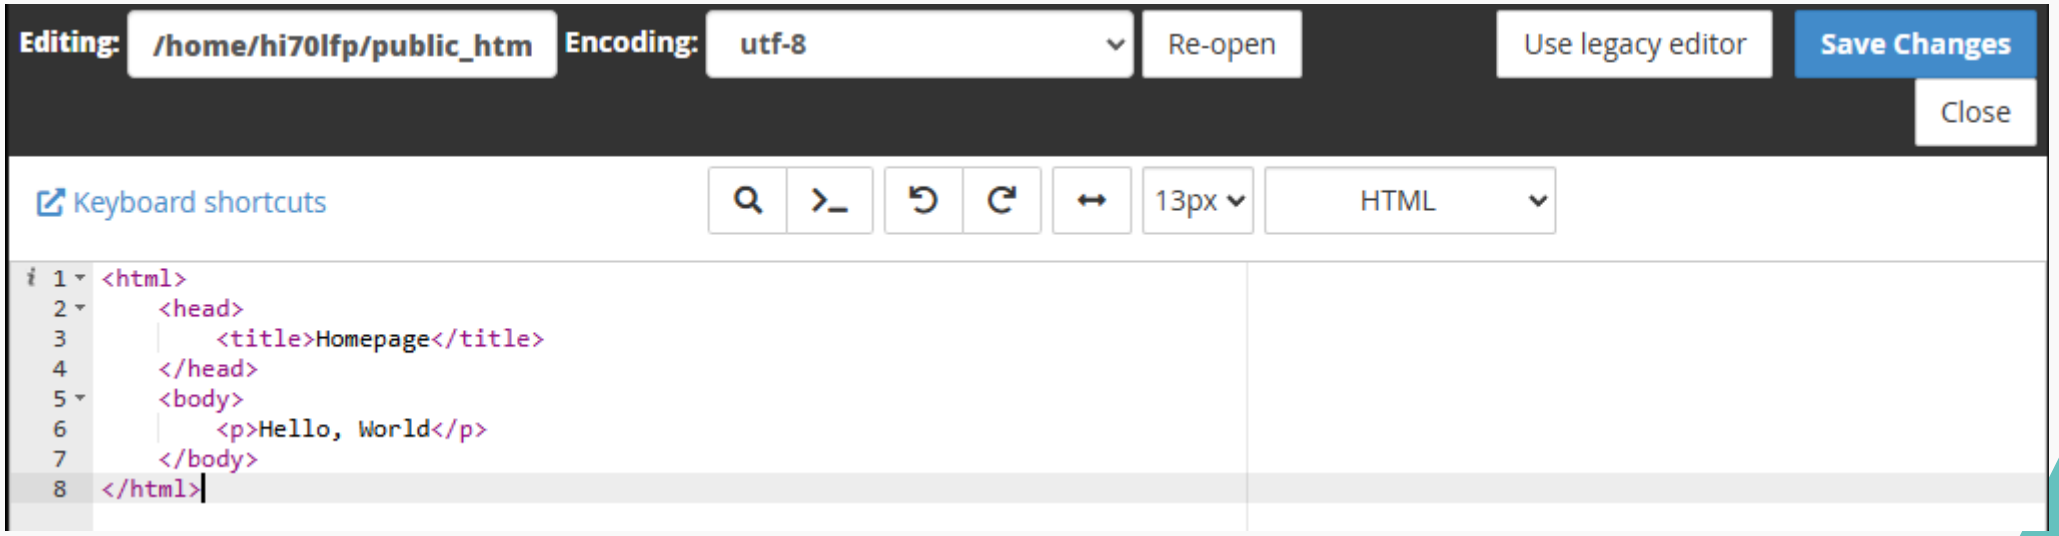

- Right click on the index.html file you created
- Left click on Edit
- Left click on the Edit button confimation

Adding content

- Type in some basic HTML, click Save Changes.

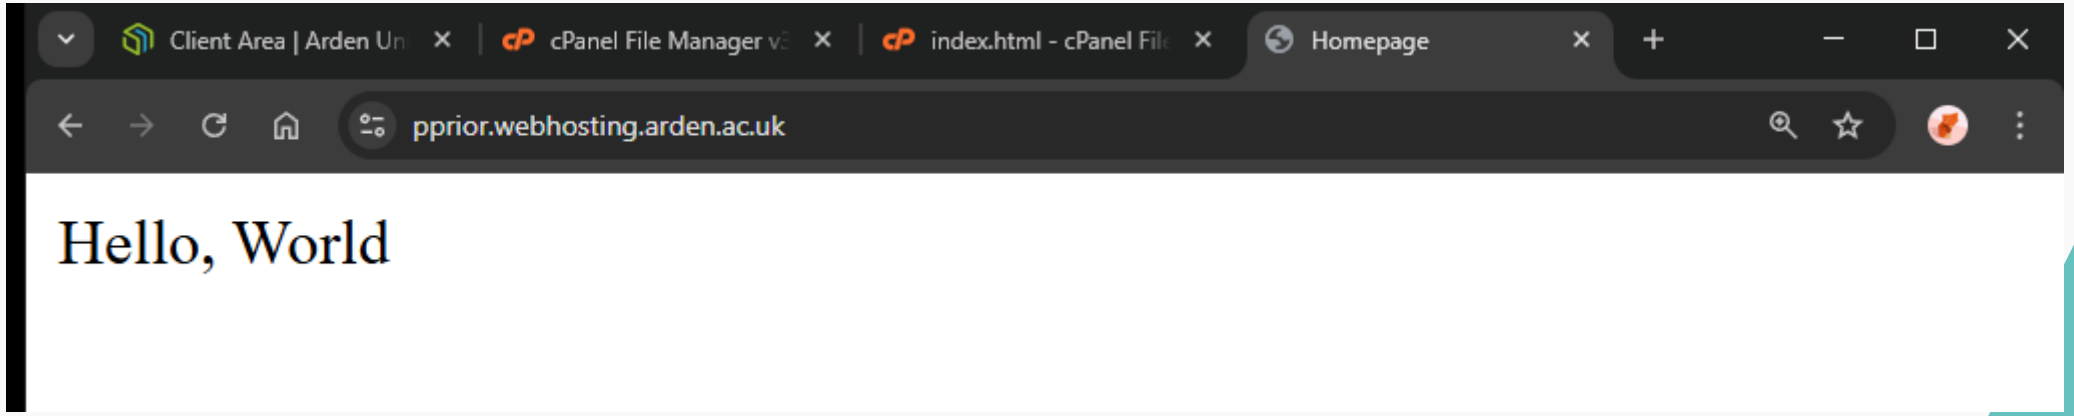

Viewing your content online

- In a new browser tab navigate to

[yourstudentnumber].webhosting.arden.ac.uk

- You should see the index.html you just created live on the web!

Break

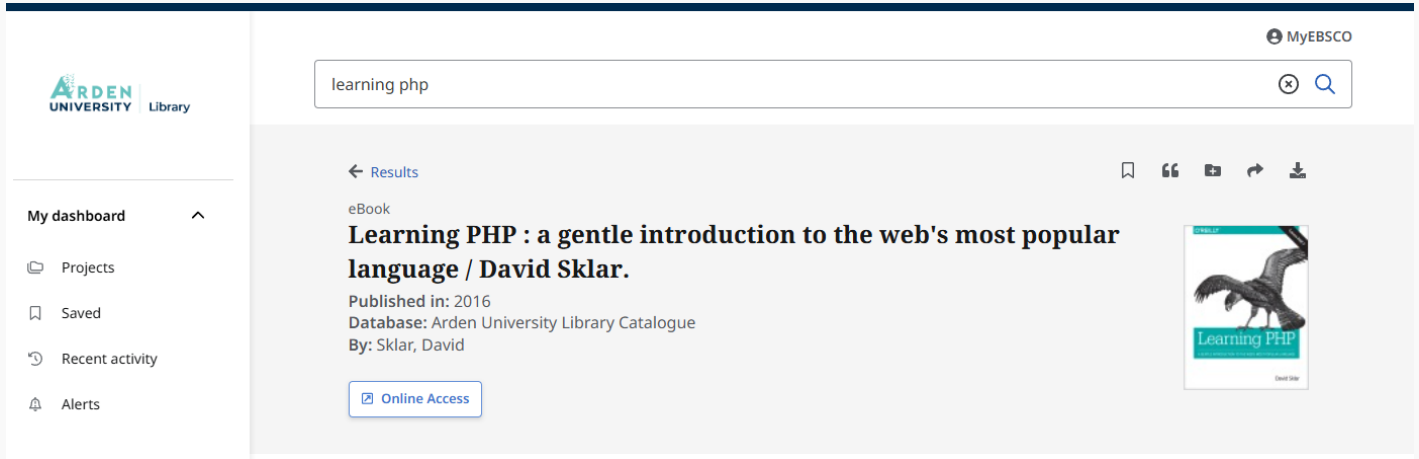

ARDEN UNIVERSITY

Activity 2
Working with PHP

Activity 2: First PHP page(s)

- Now that you can create and edit files directly on your web hosting account, open up a copy of Learning PHP by David Sklar

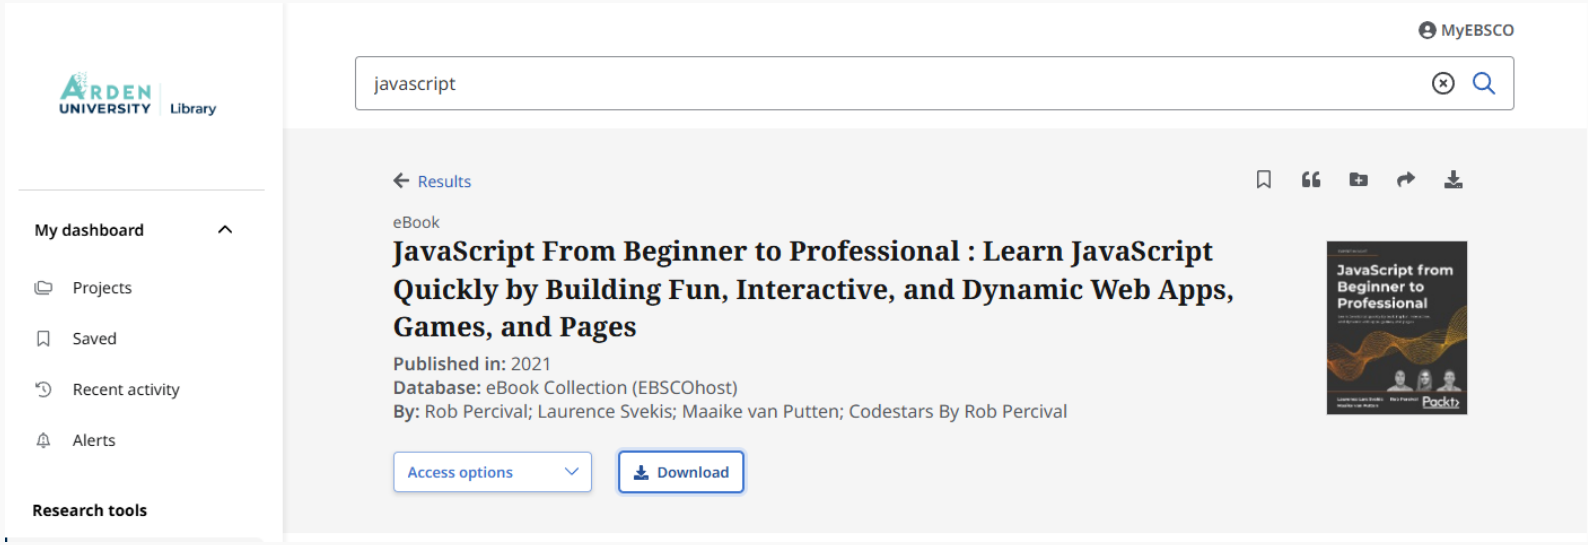

- Work through Chapter 1 and copy examples 1-1 to 1-3 to your own web space!

Activity 3
Working with JavaScript

Activity 3: First JavaScript

- To start exploring JS download a copy of JavaScript From Beginner to Professional

- Work through Chapter 1, ask your tutor if you get stuck

Break

ARDEN UNIVERSITY

Activity 4
Extended HTML

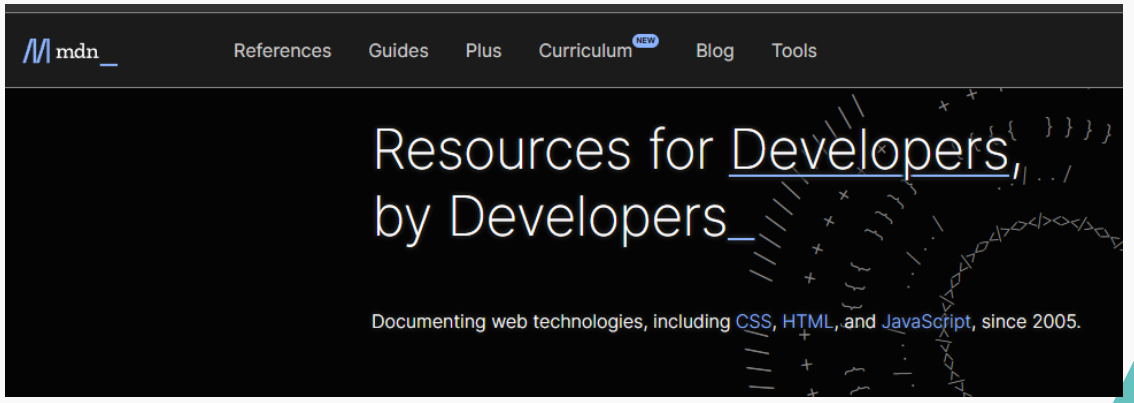

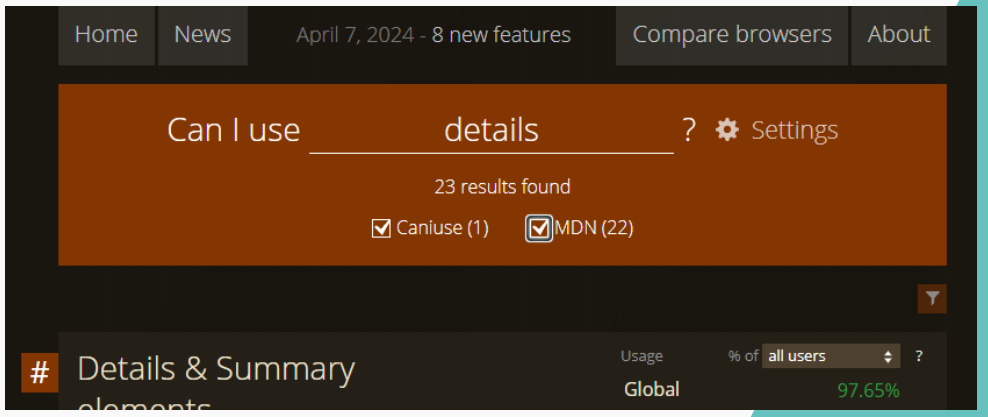

Activity 4a: Investigate newer HTML tags

Use the MDN website to find out about the <details> element.

Also, check it out on: https://caniuse.com/

Can you use <details> and <summary> to create a collapsable list of definitions for this module?

Activity 4b: Investigate older HTML tags

Check https://caniuse.com/ to look up <acronym> and .

Now review them on MDN.

What are the potential pitfalls of using older tags like these?

Break

ARDEN UNIVERSITY

+1 activity
Choose Your Own Adventure

Activity: Choose your own adventure

Use the text provided to create a static website that allows you to make choices to follow the story in a non-linear way.

If you finish the HTML structure quickly, use CSS to alter the layout then add images to make it more thematic and improve the experience.

Workshop 2
Review and wrap up

ARDEN UNIVERSITY

Review – You should now...

- Understand your own depth of knowledge of HTML
- Be able to access your web development platform and use the uploading tools
- Have demonstrated your ability to create documents using HTML, PHP and JS
- Learnt about a newer development in HTML
- Be able to use a tool to check cross browser compatibility

Next Workshop

- CSS review & connecting to a database using PHP
- Study Week 3 material on iLearn in preparation for workshop activities

Any questions?

Thank you
